EDUCATION

Brigham Young University, College of Computational, Mathematical, and Physical Science (April 27)
Provo, UT

Bachelor of Science, Computer Science, Emphasis in Software Development

Minor in Business

Relevant Coursework: Data Structures & Algorithms, Database Systems, QA & DevOps, Computer Architecture, Discrete Mathematics, Systems Programming, Artificial Intelligence, Software Design.

RELEVANT EXPERIENCE

BYU Production Services Nov 25 - Present
Software Developer Provo, UT

- Developed full-stack internal applications operating React, TypeScript, Python, SQL Server, and REST APIs, contributing to maintainable, scalable software operated by campus operations teams.
- Built a production React/Flask laundry management system for BYU with 40+ REST endpoints, supporting real-time inventory, RFID/barcode scanning, and multi-department workflows.
- Built a full-stack month-end close platform consolidating 5 billing/finance workflows and 6 legacy systems into staged dry-run, jobs, invoices flow across Oracle, SMART SQL Server, and Pace APIs.

BYU Dining Services Mar 24 - Nov 25
Software Developer (Team Leader) Provo, UT

- Built Power Apps and Power Automate solutions that automated approval workflows and reduced manual administrative work.
- Integrated SharePoint, Wrike API, and Azure Functions using Python to centralize data, automate reporting, and improve operational visibility.
- Created automated reporting tools and dashboards that helped teams track requests, performance, and operational activity.
- Led a group of 6 developers on technical initiatives and team trainings, collaborating with managers to gather requirements and deliver scalable solutions.

PROJECTS

Personal Project Jul 25 - Dec 25

- Built and launched a multiplayer soccer trivia app on the App Store using SwiftUI, Firebase Auth, and Cloud Firestore.
- Developed real-time gameplay features including room creation/join, live score sync, and game state management.
- Designed dynamic quiz flows (timed rounds, feedback, rematch logic) to improve engagement and match pacing.

SKILLS

- Languages: English (Fluent), Portuguese (Native), Spanish (Advanced)
- Technical: AWS EC2, S3, VPC, IAM, RDS, Route53, Lambda, Python, SQL, Power Automate, Power Apps, SharePoint, Azure, REST APIs, Git, Docker, n8n, Cursor, Claude Code, Codex, Automation, CI/CD pipelines, GitHub Actions, Agile.
